SPECIFICATIONS:

- 10' wide, interseeds four 30" rows
- 7.5" row spacing
- Three drill units between each corn row
- Two 110 gallon tanks for side dressing nitrogen
- One seed box
- InterSeeder weighs 4520 lbs, as a drill it weighs about 5150 lbs
- Tongue weight is approx. 2800 lbs
- Works with either 2-point hitch or tow behind
- Self-contained hydraulic system

INTERSEEDING CONSIDERATIONS:

- Cash crops need to be planted on 30" rows
- Tractor must have the correct wheel spacing
- Minimum 50-60 hp tractor
- Correct spray program using products that do not have a long residual
- Typically planted when crops are 24" or shorter
- Choose cover crop species that are more shade tolerant
- Some corn in the end rows will be run over

Due to the short planting window for interseeding cover crops, we ask that farmers schedule the unit only if you can use it immediately upon delivery. Please make sure you have the seed on hand, tractor wheel spacing adjusted correctly, etc.
